

Technical Data Sheet

Silicone 1.1.1.A Citramax

Introduction:

Silicone 1.1.1.A Citramax is a mixture of Citramax(Lemon Fragrance), Allcosil 200/30000, Allcosil 200/125000 & Allcosil 200/350. This mixture gives a 6200 ± 200 centistoke, polydimethylsiloxane silicone oil, which has a lemon scent.

Uses:

- Release agent.
Used purely or as a part of a compounded formula **Silicone 1.1.1.A Citramax** provides a non-toxic, non-carbonising mould release for rubber, plastics and metal die-castings.
- Anti-foam agent.
Very small quantities of the fluid are very effective as a foam control agent, especially in non-aqueous systems.
- Mechanical fluid.
The very high viscosity-index, the thermal and chemical stability, shear-breakdown resistance and the rubber compatibility as well as the compressibility make this fluid outstanding for mechanical and hydraulic uses.
- Lubricant.
The fluid provides excellent lubricating properties for most plastic and elastomeric surfaces. Lubricity with metals depends upon the possible combinations such as P.T.F.E., MoS2 and other lubricity improvers.
- In polishes and chemical specialties.
Silicone oil is used in most automobile and furniture polishes for its ease of application, high gloss with a minimum rubbing and durable water repellent film.
- In electrical and electronic equipment. Because of the excellent dielectric properties silicone oil is widely used as an insulating and damping fluid.

Typical Characteristics:

Product Description			
	Appearance	Clear to pale yellow liquid	
	Odour	Lemon	
Composition			
	Substance	% by Weight	
	Polydimethylsiloxane	97.5	
	Citramax	2.5	
Properties			
	Property	Unit	Value
	Viscosity	cSt	6200 ± 200
	Flashpoint	°C COC	>300
	Specific gravity @ 25°C		0.975

Features and Benefits:

Features:

- Little change in physical properties over a wide temperature range.
- The fluids are thermally stable at 150°C for extended time intervals.
- Excellent water repellence.
- Low surface tension. The fluid readily wets clean surfaces to impart water repellence and release characteristics.
- Low toxicity.

Technical Data Sheet

Silicone 1.1.1.A Citramax

Benefits:

- Good foam builder
- Imparts soft silky feel to the hair
- Ensures smooth wet shaving foams
- Non-irritant to skin

Shelf Life:

Silicone 1.1.1.A Citramax has an unlimited useful life when stored at ambient temperatures. The product does not freeze and there are no restrictions on storage.

Packaging:

200-kilo, 25-kilo and 5-kilo, non-returnable plastic drums.

Health & Safety:

Detailed advice on the Health & Safety aspects of this product is given in the individual product Safety Data Sheet (SDS), available upon request.
